ABOUT US

Commercial vehicle superstructure manufacturing is Yenkar Torunlar Company Union's main focus since 1977. Mixing the mastery in craftsmanship of co-workers, we work together more than 20 years, with young and dynamic engineers' vision, innovation has been our priority ever since. Our target is to increase the added-value in our production and serve our customers with the highest quality materials and products. Fast and effective post sales services to maintain customer happiness is the most important thing in our policy.

QUALITY IN PRODUCTION

Climate conditions, Land transportation conditions, government supervisions are considered before building any product.

Vehicle manufacturer company's directives are the most important elements for building a commercial vehicle superstructure.

For each production step we set our quality policies based on the quality management systems in international sectoral standards.

FAST SLIDABLE CURTAINSIDER BEVERAGE TRUCKBODY

Because of beverage truckbodies carry high tonnages, they usually get manufactured by using steel. Truckbodies produced in sections to fit in either 6 pallets, 6+2 half pallets or 8pallets of capacity. Pallet capacity is also decided by the pallet size our customers use, so we build the sections to be suitable with their pallet sizes. For securing the load, bottom sides of the pallet sections are curvly built.

None sectioned truckbodies are able to built being able to fit in either 6pallets, 8 pallets, 10 pallets or 12 pallets. none sectioned truckbodies have a flat floor therefore securing the load we use aluminium profiles and cargo tie down points. Beverage truckbodies are suitable for the use of hydraulic doors and usually built with it.

As Yenkar Truckbodies we do the installation of any brand lifts and keep up with their guarantee terms. Slidable Curtainsider system is the most important factor for this product, slidable curtainside system companies that we work with more than 10 years, serve us with the highest quality products.

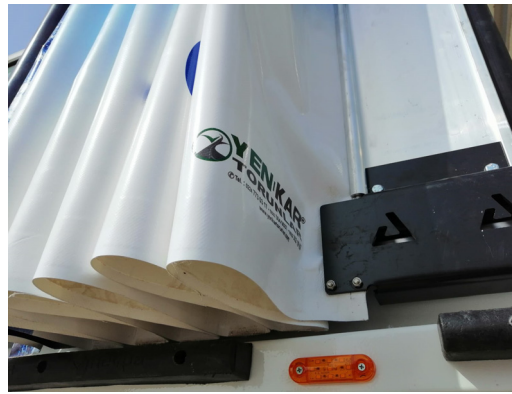

BEVERAGECOURRIER

Slidable Curtainsider system has to work well, therefore it is secured with a side barrier profile and plastic chocks, preventing the forklifts to harm the slidable system rails. This product has many options that can be added to it with customer demand.
